# ABOUT SABBA IP

**Saba & Co. Intellectual Property (Saba IP) was founded in 1926, at a time when the field of Intellectual Property Law, in the Middle East, was still in its infancy. As the region developed, the firm expanded, while never wavering from our commitment to serve you and safeguard your IP rights in the region.**

Operating through an extensive network of branches and representative offices across the Middle East, Africa and their neighboring regions, we enjoy the reputation of a leading service provider.

We are active in all areas of prosecution, registration, and enforcement of intellectual property rights, and provide a full range of related legal and paralegal services.

While protecting your intellectual property is our primary concern, we also aim to maximize the value of your brands and inventions.

# GENERAL INFORMATION ON TRADEMARK LITIGATION & ENFORCEMENT MEASURES

## GENERAL INFORMATION ON TRADEMARK ENFORCEMENT MEASURES

Protection and enforcement of Intellectual property rights are becoming essential aspects in driving growth, innovation and investment in the Middle East and North Africa (MENA). IP enforcement procedures and the possible measures vary significantly from one country to the other and trademark owners are able to benefit from a wide range of enforcement options.

Generally speaking, careful consideration should be given to the nature of the dispute before adopting a particular enforcement strategy whereby it is not always necessary to embark on litigation when tackling an infringement of trademark rights.

In counterfeiting cases, for instance, trademark owners have the option to pursue alternative enforcement measures by resorting to administrative bodies, some which are listed below. It is also possible to record trademarks at Customs authorities in various countries in the MENA and even file complaints directly with the Customs to have imported shipments of fake goods seized and destroyed without the need to obtain a court judgement. Optimum results are achieved by awaiting the best measures that each country has to offer.

## ADMINISTRATIVE ENFORCEMENT MEASURES

### United Arab Emirates - Departments of Economic Development

UAE is formed of seven Emirates each of which has its own autonomous Department of Economic Development. Although the specific procedures followed by the said departments in the different Emirates may vary, all departments allow right holders to file complaints against counterfeiters and infringers which usually leads to raiding their premises and seizing the illicit goods.

Some departments, such as the Dubai Department of Economic Development, allow brand owners to record their trademarks using an online portal. Pursuant to such a recordal, the department proactively monitors the market, reports traders offering suspect counterfeit products and carries out raids and seizures. It is also possible to provide the department with leads on specific targets.

This system has proved extremely effective and is definitely something that rights holders should consider as part of their anti-counterfeiting strategy for the UAE. The complaint with the Department of Economic Development is unlikely to succeed though without the support of a trademark registration certificate.

### Saudi Arabia - Anti Commercial Fraud Department

The most effective enforcement agency in Saudi Arabia is the Anti-Commercial Fraud Department at the Ministry of Economy and Industry. A successful action by the Department usually results in the seizure and destruction of the infringing products, a fine levied on the infringer and a signed undertakings from the infringer not to repeat the offence.

Filing a complaint with the Department achieves fast results, is simpler to put together and is considerably less expensive than seeking civil or criminal enforcement. The complaint with the Anti-Commercial Fraud Department is unlikely to succeed without

the support of a trademark registration certificate. The certificates should clearly depict an appropriate representation of the mark and a relevant description of the goods. The Department may decline to act if these are not tied closely to the infringing conduct.

### Customs Recordal and Complaints

Border measures are always a key tool in the fight against counterfeiting and piracy and are critical for successful intellectual property enforcement. In the scope of the continuous efforts to create competent border enforcement measures and to provide effective protection, the Customs in Algeria, Morocco, Sudan, UAE, Tunisia, Turkey and Cyprus have established trademark recordation systems for registered trademarks. Pursuant to these recordation systems, the owner of a trademark registration can apply to the Customs of the above-mentioned countries requesting recordation. The application should include certain information as required by the applicable policies, accompanied by the certificate of registration of the mark and a power of attorney. The Customs will then issue a recordation notice which in turn activates a watch program whereby the trademark owner (or its representative) would be notified of suspected shipments of fake goods.

Customs authorities in other countries in the region (such as Saudi Arabia, Bahrain and Qatar), and despite not having a formal trademark recordation system in place, can still be approached with information about brand owners and they are very active in sending notifications of suspected shipments.

In certain jurisdictions, such as the UAE, brand owners can file direct complaints with Customs authorities where the said authorities would issue administrative decisions to have fake goods seized and either destroyed or re-export without the need to have judicial intervention.

## AFGHANISTAN | PATENTS

No statutory laws on patents are in force. However, a measure of protection may be sought by publishing cautionary notices at regular intervals in local newspapers, thereby claiming ownership of the patent and warning third parties against infringement. Such notices could have legal value when submitted to the Courts in the event of infringement.

## GULF COOPERATION COUNCIL (GCC) | TRADEMARKS

The issuance of the Implementing Regulations of the GCC Trademark Law in May 2015 by the GCC Trade Cooperation Committee beckoned a new era for a regional trademark law in the Middle East.

The GCC states, namely, Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates, have been involved in the coordination of intellectual property since the late 80's. The GCC Patent Regulations and the Statute of the GCC Patent Office were approved in 1992 and the GCC Patent Office commenced operations in 1998, and granted its first patent in 2002.

The GCC Trademark Law, unlike the GCC Patent Law, is a unifying, not a unitary law. The Law was issued in 2006 and revised in 2014. It stipulates a set of provisions that will be applied uniformly across all the GCC, in regards to the prosecution and enforcement of trademark rights. It does not offer a unitary registration system, however.

The Trademark Offices of each GCC country will remain as the receiving office and register trademarks on a national basis. Registering a trademark across the 6 GCC countries will still require filing 6 separate national trademark applications. Furthermore, the official fees are not expected to be unified and will vary depending on the individual overhead costs of

the different TMOs involved. Furthermore, Saudi Arabia, Kuwait, and UAE have considerably increased their official fees over the past few months with Bahrain and Qatar expected to follow suit.

The definition of a trademark has significantly expanded, given the adoption of the GCC Trademark Law by the member states. Article 2 of the Law includes color marks, sound marks, and smell marks as trademarks, suggesting that it will be possible to secure registrations of such marks across the GCC.

Furthermore, multiclass applications are allowed under the GCC Trademark Law, which constitutes a major shift in trademark practices in the once single class application countries in the GCC. The registration requirements have also been updated and now include a provision for foreign words, which entails providing certified translations of the word or phrase and an indication on how to pronounce it in Arabic, as per Article 4 of the Implementing Regulations.

The examination process is harmonized now, with applications being examined within 90 days from the date of submission. The TMO will then notify the applicant of the decision. There is a 90 days period to respond to office actions from the date of notification before the application is considered abandoned.

### OTHER FEATURES OF THE TRADEMARK LAW ARE:

- Claim of priority, based on an earlier-filed foreign application, is possible
- Trademark applications accepted by the Registrar will be published for opposition purposes. Oppositions must be filed within 60 days from publication date
- Trademark registrations are valid for 10 years from filing date and are renewable for like periods. There is a grace period of 6 months for late renewals
- A trademark is vulnerable to cancellation by any interested party if there has been no effective use of the mark for a period of 5 consecutive years after registration
- The Law recognizes famous trademarks that are well-known in the GCC member states and shall ensure protection thereof even if the marks are not registered
- The Law gives the right to trademark owners to initiate civil and criminal actions against any infringing party. Penalties include a maximum of 5 years imprisonment and payment of fines of up to US 270,000\$

## GULF COOPERATION COUNCIL (GCC) | PATENTS

On January 6, 2021, following several decisions that were issued by the Gulf Cooperation Council Supreme Council during its 41st meeting on January 5, 2021, an amended GCC Patent Law (Regulation) was approved. In a statement made on its official website, the GCC Patent Office (GCCPO) announced that as of January 6, 2021, it will no longer accept new patent application filings.

Following this unexpected announcement by the GCCPO, any applicants who are interested in filing a new patent application in any of the six member countries, namely Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates, should either: (1) file a patent application via the Paris Convention

in each member country within 12 months from the earliest filed priority application; or (2) file a Patent Cooperation Treaty (PCT) application and then enter the national phase in each of one or more of the six above-mentioned member countries.

## GENERAL INFORMATION ON TRADEMARKS

Country	Nice Edition	Multiple /Single Class Application	POA	Priority	Opposition Period	Protection Term	Renewal Grace Period
Afghanistan	10 <sup>th</sup>	Single	Legalized	Yes	30 days from publication date	10 years from filing date, renewable for like periods	-
